Global Implementation Considerations for Microsoft Dynamics

Daniel Rimmelzwaan
Chief Quality Officer
KCP Dynamics

Introducing

Daniel Rimmelzwaan

Chief Quality Officer – KCP Dynamics

Visit us at Booth 101

Microsoft MVP since 2005

Objectives

- Application Lifecycle Management
- Decision Making Criteria
- Product Positioning

Application Lifecycle Management

“... An application’s lifecycle includes the entire time during which an organization is spending money on this asset, from the initial idea to the end of the application’s life. To be both accurate and useful, our view of application lifecycle management should take an equally broad perspective.

Anything else just isn’t right.”

DAVID CHAPPELL, 2008

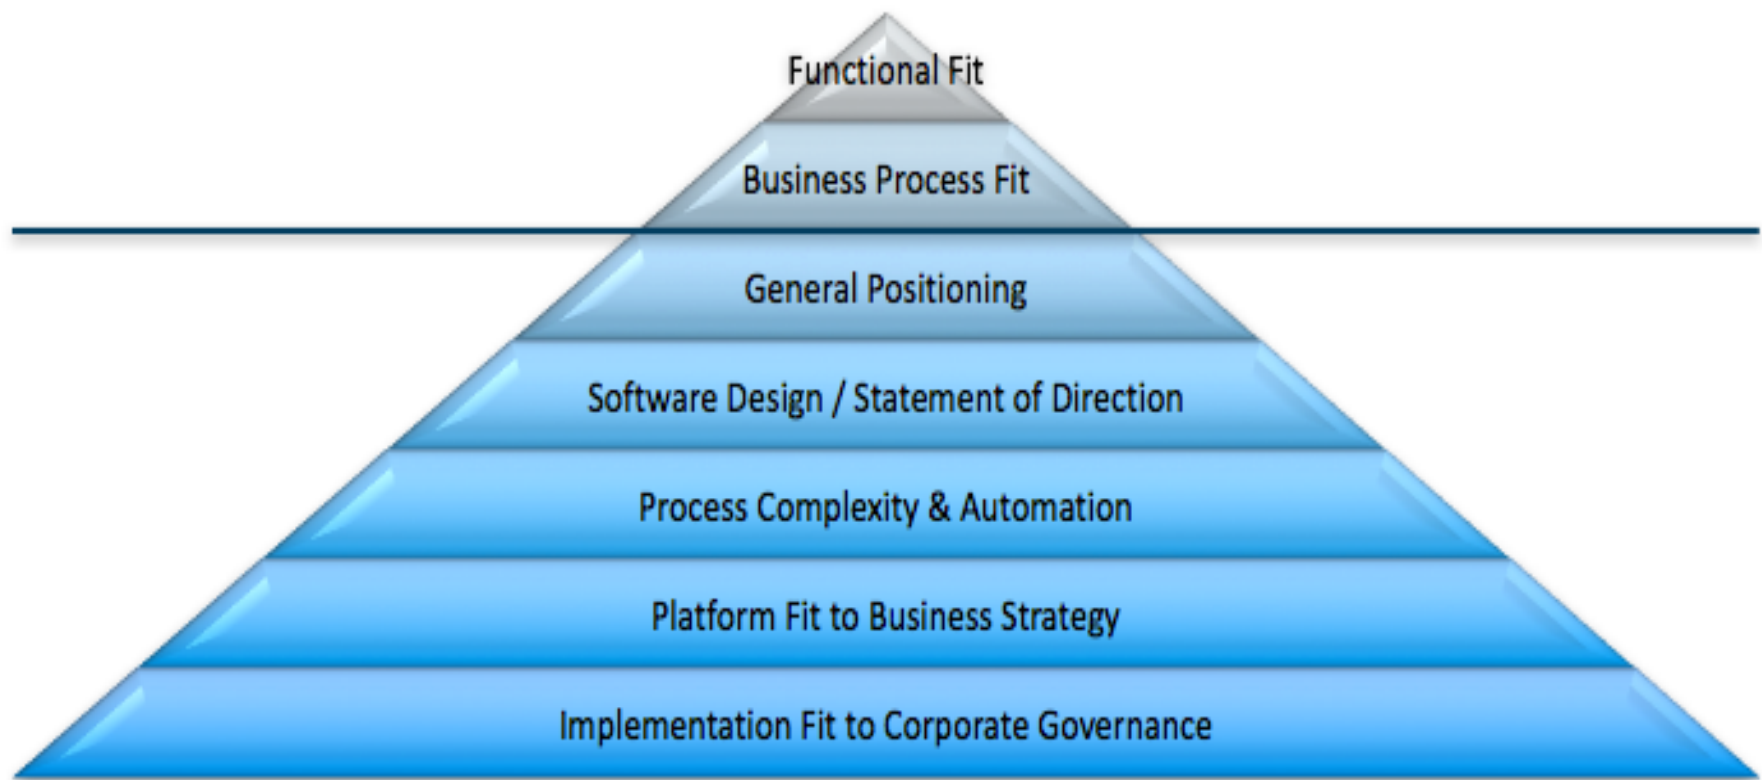

Implementation Process

- Business Analysis
- Solution Approach
 - Product Selection
- Design, Development, Testing
- Training and Deployment

Management Process

- Infrastructure Management
- Software Change Management
- Application Integration
- User Support

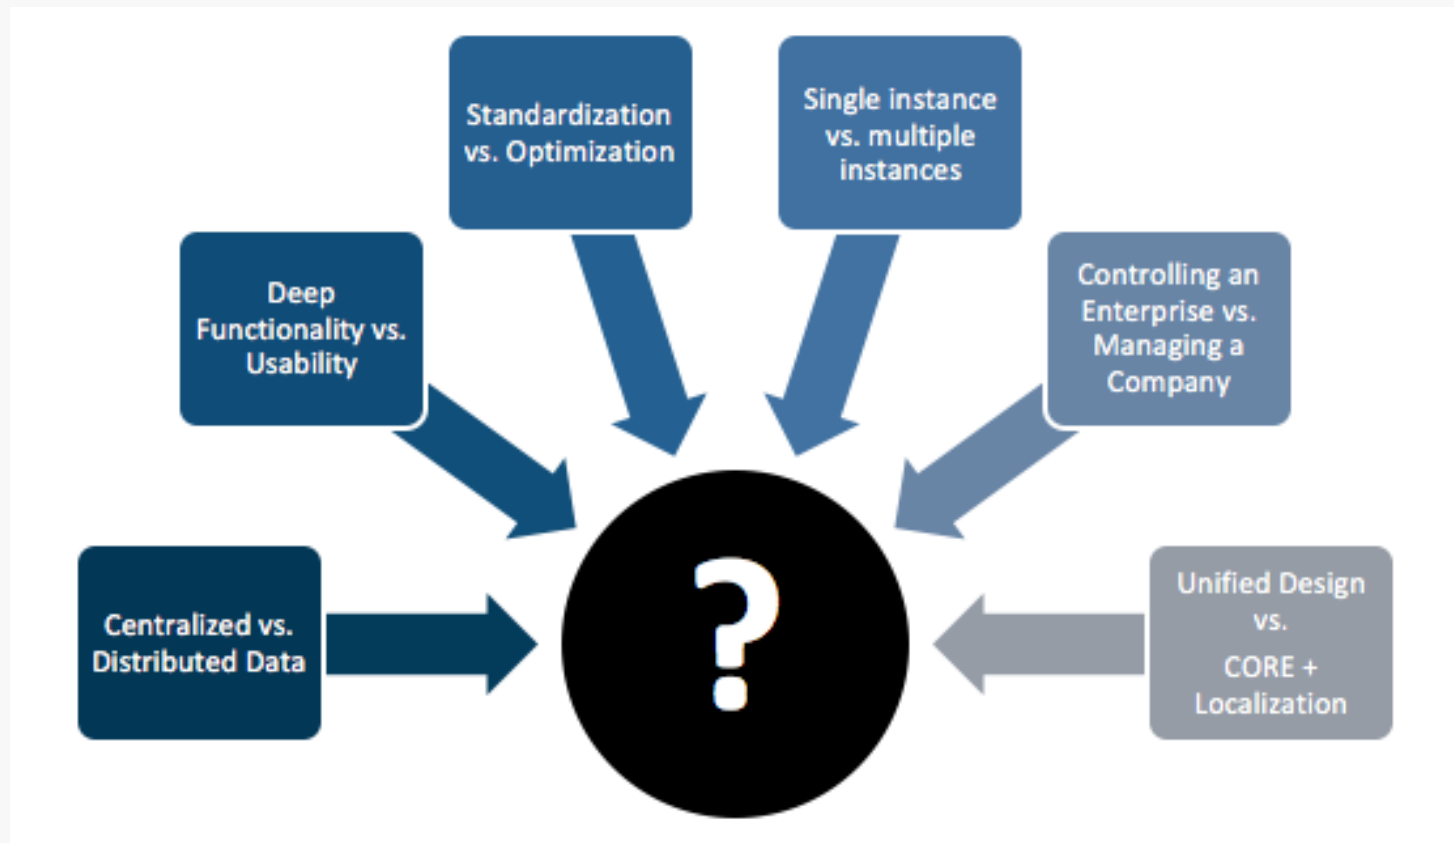

Implementation Considerations

Decision Making Criteria

Critical Criteria

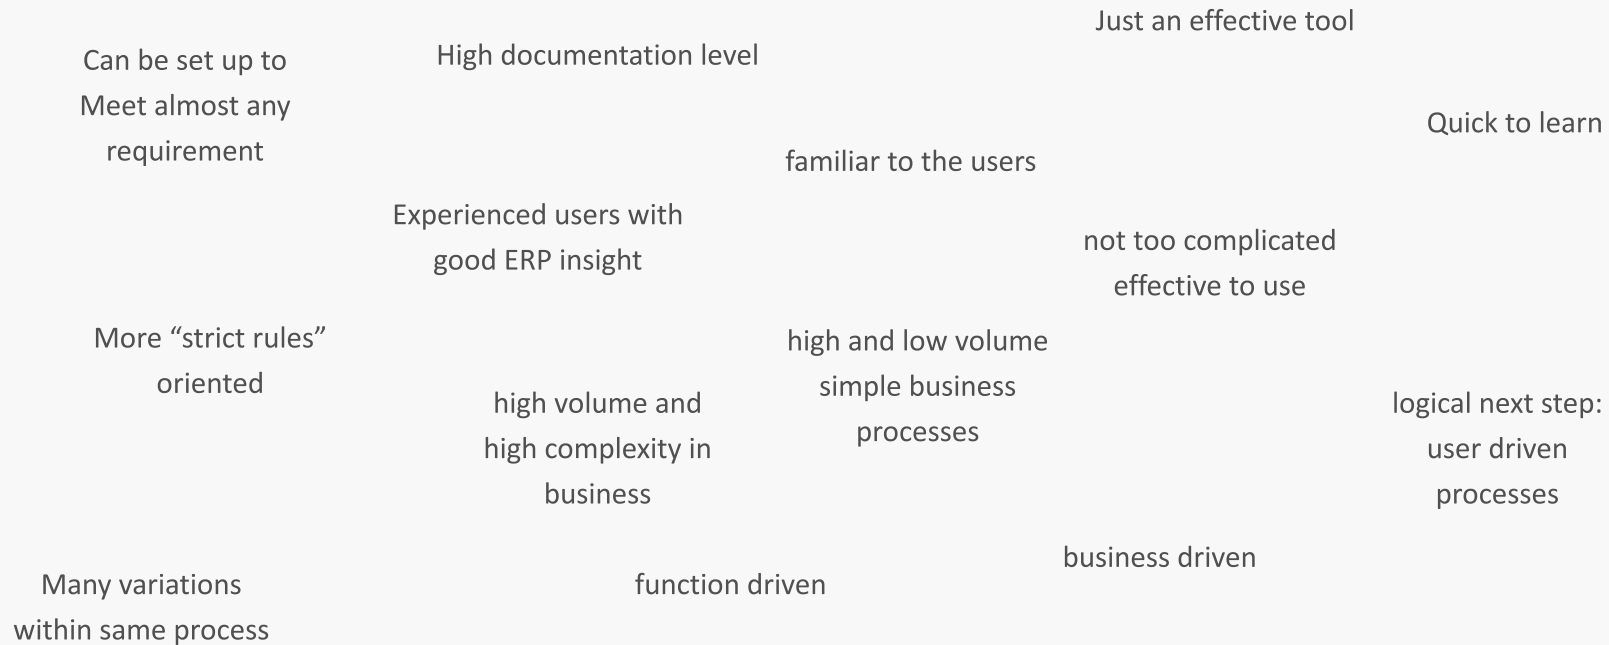

Centralized vs Distributed Data

*Does the business in general
require that everyone is working
on the same data or is the data
shared when needed?*

Deep Functionality vs Usability

Standardization vs Optimization

Standardization

<- not mutually exclusive ->

Optimization

- Everyone works the same way
- The same process everywhere

- Each business line /region can optimize
- Flexibility to meet market requirements
- Freedom to innovate

Single Instance vs Multiple Instances

Single Instance

Multiple Instances

- Simplified Infrastructure
- Efficient Maintenance
- Centralized Control
- Licensing Economy

- Multi tenant
- Localized Control
- No Single Point of Failure
- Lower Performance Requirements

Managing an Enterprise or a Company

- Operational Efficiency
- Business KPI Benchmarking
- “Process Branding”
- Market follows the business

Requires Stability

- Innovation
- Local Competition
- Changing Market Requirements
- Business follows the Market

Requires Flexibility

Central management controls an enterprise
Local management runs a company

How do you see yourself?

Product Positioning

Microsoft Dynamics ERP Positioning

Microsoft Dynamics NAV

Highly functional, flexible, affordable business solution that is designed to:

- Give you greater control over the key decisions that affect the success of your business
- Enhance your margins – reducing transaction costs and increasing your focus on the most profitable customers, products, and services
- Support the changing needs of your business

Microsoft Dynamics AX

Designed for enterprises with 200 to 7,500 users that:

- empowers people to anticipate and embrace change
- helps employees be more productive and increase the value of data by providing all people in the organization with access to critical business information

The unified global solution promotes rapid adoption

Thank you
